today in an exclusive base ball family feud—a world series between the Giants and Yankees fought out in its own back yard. Easly 38,000 folks came out here to the old Polo Grounds to see the New York Giants, pennant winners of the National League, and the New York Yankees, champions of the American League, in the internecine quarrel for the base ball championship of the universe. Downtown speculators were reported selling reserved seats at prices that would have shocked a profiteering landlord.

Takes Step to Unite Lincoln Memorial and Arlington by Beautiful Span.

CONGRESS TO BE ASKED TO PROVIDE \$25,000

Structure Expected to Cost From \$3,000,000 to \$10,000,000. War Halted Project.

President Harding has directed the transmission to Congress of an estimate of \$25,000 for preparation of plans for the Arlington memorial bridge, to span the Potomac river beween the Lincoln Memorial and Ar-

As chairman of the Arlington me norial commission, created by Congress in 1913, the President, it was earned today, believes this greatest of all national memorial projects, which is to be the connecting link between north and south and the symbol of a united nation, should be launched during the coming fiscal year.

He has instructed Col. Clarence O.

He has instructed Col. Clarence O. Sherrill, officer in charge of public buildings and grounds, who is the executive officer of the memorial commission, to transmit the estimate for preparation of plans at the time the regular administrative budgets are sent to Congress in December.

Approval Expected.

Approval Expected.

There is every probability the estimate will be approved. The members of the commission, in addition to the President, are the Vice President, the Speaker of the House of Representatives and the chairmen of the public buildings and grounds committees of the Senate and House.

It has been the policy of the government to keep at least one big memorial project under way constantly and, as the Lincoln Memorial practically is completed, it is understood to be be the President's opinion work on the Arlington bridge should be started as soon as plans can be prepared. But for the war the bridge doubtless would have been under construction by now.

Bridge Estimates Vary. Representative Mondell vigorously opposed the sales tax proposition, telling the President that such a proposal had little support in the House. He declared a sales tax schedule like that proposed in the Senate would fail to accomplish the reduction of tax burdens contemplated by the work to put it into practical form. The legislative program as worked out among congressional leaders and the administration, the House leader said, provided for consideration at this session of tax and tariff legislation, the railroad financing bill, the foreign debt funding measure, the anti-beer bill and bills for road improvement and maternity relief. Should the tariff bill fail of final passage, he added, it would be necessary also to pass an extension of the present emergency tariff schedule.

Congress Pledged to Help.

Congress is pledged to provide the money that will be necessary for the preparation of plans, as the act of 1913, creating the commission, authorized an expenditure of \$25,000 for this purpose. The actual approximates a supercontact of the commission of t

The American Legion has been called upon to assist in making arrangements for this gigantic undestairing. It is expected that it will report large interest in the proposition, and that the public will evince much interest in hearing the President's address at such great distance.

There is considerably more to the sounded as to the state of the state of court business in each circuit. Such legislation, Mr. Taft said, would provide for "reasonable supervision of federal courts."

For half an hour the Chief Justice, in an informal manner, discussed the advisability of revising the nation's federal court system. Frequently he was questioned by senators. Bills pending before the Senate, he said, would provide "immediate relief," and would provide "immediate relief," and would in no way interfere with revision of court procedure, and rearrangement of judicial districts, which he added, should be undertaken in the president's address at such great distance.

"The newspapers have been co-operating with the people in the investment business before accepting advertisements of such speculative stocks," Mr. Thompson said, and Mr. Wholley said that the Washington newspapers in the last year have refused more than \$120,000 worth of advertising on fraudulent securities, some of which offers were accompanied by certified checks.

Mr. Thompson said that one concern now employs fifty persons soliciting from employes in the government departments. He tesified that in one month 150 offerings of all kinds of promotion schemes came to his desk and that the "mails are simply loaded with them."

"I think the peak in the number of cases growing out of violations of the Volstead act has been reached," said Mr. Daugherty, adding that when

the public realized the law was going to be enforced there would be a marked decrease in the number of cases.

"Don't you believe that for a time prohibition law violations will continue to increase?" inquired Senator Sterling, republican, South Dakota, who has been pressing for an early vote in the Senate on the anti-beer bill.

"No, I don't," the Attorney General replied.

At the outset in the prosecution of violators of state and local prohibition laws, Mr. Daugherty continued,
